

Experience

Software Engineer	SAP-NS2 Mission	Jan 2022 – Present
- Developed and maintained microservices using Java Spring Boot and Apache Kafka to support a distributed data ingestion and cataloging platform deployed on AWS infrastructure via CloudFormation, EC2, and RDS - Led development of an overhauled analytics dashboard and supporting Java Spring backend with 80% more viewable metrics and dashboard creation/sharing features - Led development of an overhauled page routing system to allow for 75% more bookmarkable pages and route state persistence in the webapps utilizing browser session storage - Led development of a page for viewing and linking between Apache Kafka topics, including message publishing support and inspection at particular partitions and offsets - Led development of infrastructure pages for viewing core system components such as Apache Kafka Brokers and ZooKeeper instances, reducing system monitoring overhead by 45% - Designed and implemented shared Vue components for viewing and managing user and role-based permissions across multiple domains, supporting full CRUD operations across resources and integrating enterprise role systems from external platforms - Conducted internal deep-dive sessions on Apache Kafka and metrics infrastructure and published 20+ pages of documentation absent from the codebase		

Founding Member	API Labs	Aug 2025 – Present
- Built multiple production APIs commercialized through RapidAPI marketplace, with 50% less latency than competitors - Architected scalable scraping via proxy rotation, network analysis, and caching using Python, Docker and PostgreSQL		

Founding Member	Bugbeam.io	Dec 2025 – Present
- Built SaaS bug reporting and feedback automation platform for internal teams and external users - Developed browser extension and embeddable widgets for screenshots, metadata and logging capture, and AI feedback / bug triaging - Built Github, Jira, Asana, Monday, Trello, Zendesk, and Slack integrations		

Software Engineer Intern	SAP-NS2 Mission	May 2020 – Aug 2021
- Led development of a UI searching mechanism with editable search filters that persist in the session - Led development of a shared library for viewing and managing user, role, and resource permissions		

Projects

Music Social Media	2023 – 2024
- Created a React web application for viewing and sharing music data from Spotify and/or YouTube Music with a social media feed with post that users could share or comment on - Utilized Java Spring, PostgreSQL, and Docker to maintain music history and related metadata	
Discord Bot	2019 – 2021
- Developed using Node.js and TypeScript with commands such as message quoting and minigame support - Used OpenAI's GPT-2 to create LLM models that generate text to mimic users based on chat history	

Education

Rochester, NY	Rochester Institute of Technology	Aug 2017 – Dec 2021
Bachelor of Science in Computer Science, Minor in Mathematics		GPA: 3.78, magna cum laude

Skills

- Languages: TypeScript/JavaScript, Java, Python, HTML, CSS, SQL, GraphQL, Bash/PowerShell, C, C#, Assembly (MIPS), Haskell
- Frameworks & Libraries: Vue.js, Java Spring Boot, React, React Redux, Docker, Apache Kafka, Jest, Tailwind
- Tools: Git, Unix, PostgreSQL, MySQL, MongoDB, npm/pnpm, Node.js, Vite, Swagger, AWS (CloudFormation, EC2, RDS), Gradle, Maven, GitHub, Jira, Grafana, Postman, Kibana
